Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/731,975

Applicant(s)

CARLSSON ET AL.

Examiner

DANH C LE

Art Unit

2683

— The MAILING DATE of this communication appears on the cover sheet with the correspondence address —

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 May 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-41 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-41 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-4, 6-10, 12-13, 15-17, 19, 20, 22-25, 27-30, 32-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Silver (US 6,560,457).

As to claim 1, Silver teaches a method for determining a position of a mobile terminal (figure 4 and col.8, line 24-col.9, line 4) comprising:

transmitting a paging request to the a mobile terminal via the a first control channel for packet data services, the patting request indicating a circuit switched service;

switching from the first control channel to a second control channel for circuits witched services;

receiving a paging response from the mobile terminal via the second control channel; and

determining the position of the mobile terminal based on the paging response.

As to claim 2, Silver teaches the method of claim 1 wherein the first control channel is a packet control channel and the second control channel is a circuit-switched control channel (figure 1, 134, 132).

As to claim 3, Silver teaches the method of claim 2 wherein the first control channel is an Enhanced General Packet Radio Service 136 (EGPRS-136) control channel and the second control channel is a digital control channel (col.2, line 5-18).

As to claim 4, Silver teaches the method of claim 1 further comprising: transmitting, in response to the paging response, a release message via the second control channel (figure 4 and col.8, line 24-col.9, line 4);

As to claim 6, Silver teaches the method of claim 1 wherein the determining the position of the mobile terminal based on the paging response comprises: determining a cell in which the mobile terminal is positioned (figure 4 and col.8, line 24-col.9, line 4).

As to claim 7, the claim is the system claim of claim 1; therefore, the claim is interpreted and rejected as set forth in the claim 1.

As to claim 8, the claim is the system claim of claim 2; therefore, the claim is interpreted and rejected as set forth in the claim 2.

As to claim 9, the claim is the system claim of claim 3; therefore, the claim is interpreted and rejected as set forth in the claim 3.

As to claim 10, the claim is the system claim of claim 4; therefore, the claim is interpreted and rejected as set forth in the claim 4.

As to claim 12, the claim is the computer claim of claim 1; therefore, the claim is interpreted and rejected as set forth in the claim 1.

As to claim 13, the claim is the computer claim of claim 2; therefore, the claim is interpreted and rejected as set forth in the claim 2.

As to claim 15, the claim is the computer claim of claim 4; therefore, the claim is interpreted and rejected as set forth in the claim 4.

As to claim 16, Silver teaches the method for determining a position of a mobile terminal (figure 4 and col.8, line 24-col.9, line 4) comprising:

transmitting a paging request to the mobile terminal via the a first control channel for packet data services, the paging request indicating a circuit switched service;

switching from the first control channel to a second control channel for circuit switched services; receiving a paging response via the second control channel from the mobile terminal;

transmitting a position request to the mobile terminal;

receiving a position response from the mobile terminal; and determining the position of the mobile terminal based on the position response.

As to claim 17, the limitation of the claim is the same as the limitation of claim 2; therefore, the claim is interpreted and rejected as set forth in the claim 2.

As to claim 19, the limitation of the claim is the same as the limitation of claim 4; therefore, the claim is interpreted and rejected as set forth in the claim 4.

As to claim 20, Silver teaches the method of claim 16 further comprising:
transmitting a release message after receiving the position response (col.6, line 47-col.8, line 52).

As to claim 22, the claim is the system claim of claim 16; therefore, the claim is interpreted and rejected as set forth in the claim 16.

As to claim 23, the claim is the system claim of claim 17; therefore, the claim is interpreted and rejected as set forth in the claim 17.

As to claim 24, the claim is the system claim of claim 18; therefore, the claim is interpreted and rejected as set forth in the claim 18.

As to claim 25, the claim is the system claim of claim 19; therefore, the claim is interpreted and rejected as set forth in the claim 19.

As to claim 27, the claim is the computer claim of claim 16; therefore, the claim is interpreted and rejected as set forth in the claim 16.

As to claim 28, the claim is the computer claim of claim 17; therefore, the claim is interpreted and rejected as set forth in the claim 17.

As to claim 29, the claim is the computer claim of claim 18; therefore, the claim is interpreted and rejected as set forth in the claim 18.

As to claim 30, the claim is the computer claim of claim 19; therefore, the claim is interpreted and rejected as set forth in the claim 19.

As to claim 32, Silver teaches the method of determining the position of a mobile terminal (figure 4 and col.8, line 24-col.9, line 4) comprising:

receiving a paging request from a wireless communications network over a first control channel for packet data services, the paging request indicating a circuit switched service;

switching from the first control channel to a second control channel for circuit switched services; and

transmitting a paging response over the second control channel.

As to claim 33, Silver teaches the method of claim 33 further comprising suspending packet data services responsive to the paging request (figure 4 and col.8, line 24-col.9, line 4).

As to claim 34, Silver teaches the method of claim 33 wherein the wireless communications network determines the position of the mobile terminal based on the paging response (figure 4 and col.8, line 24-col.9, line 4).

As to claim 35, Silver teaches the method of claim 33 further comprising receiving a position request from the wireless communications network (figure 4 and col.8, line 24-col.9, line 4).

As to claim 36, Silver teaches the method of claim 35 further comprising transmitting a position response to the wireless communications network (figure 4 and col.8, line 24-col.9, line 4).

As to claim 37, Silver teaches the method of claim 36 wherein the wireless communications network determines the position of the mobile terminal based on the position response (figure 4 and col.8, line 24-col.9, line 4).

As to claim 38, Silver teaches a mobile terminal (figure 4 and col.8, line 24-col.9, line 4) comprising:

a transceiver to communicate in a voice mode and a packet data mode; and

a processing unit communicatively connected to the transceiver and configured to: receive a paging request from the wireless communications network over a first control channel for packet data services, the paging request indicating a circuit switched service;

switch to a second control channel for circuit-switched services responsive to the paging request over the first control channel; and

transmit a paging response to the wireless communications network over the second control channel.

As to claim 39, Silver teaches the mobile terminal of claim 38 wherein the processor is configured to suspend a packet data session responsive to the paging request (figure 4 and col.8, line 24-col.9, line 4).

As to claim 40, Silver teaches the mobile terminal of claim 38 wherein the processor is configured to receive a position request from the wireless communications network (figure 4 and col.8, line 24-col.9, line 4).

As to claim 41, Silver teaches the mobile terminal of claim 40 wherein the processor is configured to transmit a position response to the wireless communications network (figure 4 and col.8, line 24-col.9, line 4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6, 11, 21, 26 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silver in view of Verdonk (US 6,330,454).

As to claims 6, 11, 21, 26, 31, Silver teaches the method of claim 1, Silver fails to teach the determining the position of the mobile terminal based on the paging response comprises: determining a cell in which the mobile terminal is positioned. Verdonk teaches the determining the position of the mobile terminal based on the paging response comprises: determining a cell in which the mobile terminal is positioned (col.2, line 29-col.3, line 11). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Verdonk into the system of Silver in order to determines an approximate location of the mobile unit.

3. Claims 5, 14, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silver in view of Ross (US 6,263,212)

As to claim 5, Silver teaches the method of claim 1. Silver fails to teach the paging request is one of a hard page and a layer 3 page comprising a teleservice indication or Wide Open R-Data Transport indication. Ross teaches the paging request is one of a hard page and a layer 3 page comprising a teleservice indication or Wide Open R-Data Transport indication (col.7, lines 37-60). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the teaching of Ross into the system of Silver in order to prioritize according to their specific teleservice type.

Response to Arguments

Applicant's arguments with respect to claims 1-41 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire ~~THREE~~ MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANH C LE whose telephone number is 703-306-0542. The examiner can normally be reached on 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM TROST can be reached on 703-308-5318. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
